Just wanted to let everyone know, we took a hopeful trip to try to squeeze a flight in today, out to the field. All of the snow is gone from the runway and just a little is left in the pit area. We had about a 15 MPH crosswind, so we did not fly. The sun shade is in perfect condition, no snow damage what-so-ever. We checked the lawn mower shed, it is in as good of condition as it was before the snow, so no new damage there either. Both lawn mowers had several flat tires, but they both cranked on their own, so the batteries should be OK for this year.

All in all everything seems to have weathered the storms pretty well, we will be having a spring clean up day, work on the lawn mowers, just a basic get the field ready day around early-mid April. Just thought you guys may want an update, I have had a lot of members asking me how it is out there and I did not know until today, so there you have it.

Don't forget about the Pre Spring Fling on March 13th. It looks like there is going to be a good turnout so far, please try to come if you can. I think this could be the thing that we have been looking for to make the club some money. It has a lot of potential to become a HUGE event. Maybe we can hire a lawn service to cut all of our grass at the field.....ahhhhh, I gotta dream a little.

Miranda has really worked hard getting us prizes for this event. She went through 5 different RC magazines and emailed *EVERY* company/business advertised in them. We have gotten several prizes from that alone. It has been a lot of work, but I am hoping that it will be well worth all the effort.

Till next time...

See ya,

Cliff
